YIMIN RIVER TOWN

Inner Mongolia China

AJ+C

内蒙古大自然的和谐及浓厚的传统文化气息正贯穿着一个独特的伊敏河新镇。该项目位于中国长城北部1,000公里，并将成为100,000居民的家园，其中包括12个少数民族。这些居民大多为游牧，始终与大地有着深切的情感。

AJ+C与Appleyard Forrest的合作的目标是创建以自然生态平衡为本的现代化都市生活。目前在中国最普遍的城市规划是以行政区为中心，而伊敏新镇的规划中心则是位于两条河流的汇合处。湿地被誉为市镇的核心，从中河流成为休闲与娱乐区的自然的回廊。

总体规划中包括公共广场、行政大楼、娱乐和商业区、山脉和森林公园等，建筑形态为4-6层高。为表达对传统文化的敬意，公共建筑保留了蒙古圆顶帐篷的一些理念。

AJ+C以自然生态为本的新镇规划在今天的中国仍为首列。

**YIMIN RIVER TOWN**  
Inner Mongolia China

Nature and cultural heritage flow through a unique new town at Yimin, Inner Mongolia. Located on a vast river plain 1,000 kilometres north of the Great Wall of China, the site will become a home to 100,000 people from 12 national minority groups - most of them historically nomadic peoples with a deep affinity with the natural environment.

With associates Appleyard Forest, AJ+C set out to reconcile the competing demands of urbanisation in an ecologically sensitive environment. Most Chinese towns begin from an administrative core, but Yimin is symbolically placed at the junction of two rivers. The wetlands become the town's core, with rivers forming natural 'corridors' for prime recreational and social areas.

The masterplan includes public plazas, administrative buildings, recreational and retail spaces, mountain and forest parks, and apartment buildings that are 4 – 6 storeys high. In paying homage to tradition, public buildings refer to the 'yurt' building form of the region.

AJ+C is creating what is believed to be the first ecologically-driven new town in contemporary China
